External Web sites that link to coris.noaa.gov	~475
Selected sites of interest:	
United States Coral Reef Task Force	
South Carolina Sea Grant Consortium	
USGS Coral Reefs Web Site	
The National Wildlife Federation	

NOTES:

¹ Visitor Sessions -- A visit (or session) is defined as activity by one computer at one address over a period of time, up to a period of 30 minutes of inactivity. These numbers are best used for trend analysis. Megabytes Downloaded – The volume of all files sent during the period, measured in bytes. One megabyte equals 1,048,576 bytes. For comparison, a simple page of text, without graphics, averages around 2,500 bytes, so one megabyte is equivalent to 420 pages of text. Source: <http://staff.nos.noaa.gov/stats/coris/reportcoris0407/>

² The number of downloads includes counts of partial downloads. The National Coral Reef Action Strategy, for example, can be downloaded in its entirety, or in sections. The number of downloads reported here includes the total of all complete and partial downloads.

³ The number of metadata files accessed is an indication of interest in data sets. There is not a way to determine whether or not the actual data were downloaded because most data reside on other servers.
